# New Cross-Sector Programs: CalAIM and HHIP

---

## CalAIM

- Enhanced Care Management
- Community Supports

## Housing and Homelessness Incentive Program (HHIP)

# CalAIM: Housing-Related Services

## Enhanced Care Management (ECM)

- Statewide care coordination benefit for Medi-Cal members with the most complex needs. MCPs required to offer to individuals who meet eligibility criteria
- ECM providers **meet members where they are**, whether that's in a shelter, encampment, at home, or otherwise.
- Several "Populations of Focus" including individuals experiencing homelessness.

# CalAIM: Housing-Related Services

## Community Supports

- Optional services that MCPs can offer to address social drivers of health.
- Includes **housing-related services like housing navigation, housing deposits, and housing tenancy and sustaining services.** (The “Housing Trio”)
- California is adding Transitional Rent as a new Community Support, mandated by January 1, 2026.

# Housing and Homelessness Incentive Program (HHIP)

- **Sought to accelerate collaboration between MCPs and homeless response systems** using one-time ARPA funds.
- MCPs earned incentive funds by meeting metrics that required collaboration with local homeless response system partners.
- MCPs could invest flexible HHIP funds into local homeless response systems, build infrastructure for cross-sector collaboration, and/or expand service capacity.

Moving Forward:  
Recommendations and  
Wrap Up

# Housing & Homelessness Incentive Program (HHIP)

## Implementation Successes and Challenges

- Flexible financial incentives and minimal bureaucracy catalyzed cross-sector collaboration.
- A short program runway, insufficient and changing information, delayed guidance, and inaccessible performance metrics compromised MCPs' and CoCs' ability to fully collaborate.
- Uneven power dynamics and misunderstanding between health care and homeless response systems led to missed opportunities.

# ECM and Community Supports

## Implementation Successes

- ECM/CS provide critical services to people experiencing homelessness.
- Medi-Cal is enhancing housing-related services that the homeless system of care typically funds with scarce resources.
- MCPs are developing strong relationships with their ECM/CS providers and homeless systems of care and building internal capacity to better serve members experiencing homelessness.
- Counties are supporting implementation of ECM/CS through administrative and contracting approaches.

# ECM and Community Supports

## Implementation Challenges

- CalAIM administrative requirements create operational hurdles, especially for providers new to Medi-Cal.
- Enrollment in/awareness of ECM/CS is still extremely low.
- CalAIM creates financial pressures for ECM/CS providers serving people experiencing homelessness and Medi-Cal funding limitations lead to confusion and competition.
- MCPs and homeless systems of care have different perspectives on housing-related supportive services.
- Disconnected referral systems and inconsistent use of HMIS creates barriers to referrals and care coordination.

## You're Not Alone If...

- It takes longer for you to engage and provide services to unhoused individuals compared to other Medi-Cal members.
- The Medi-Cal rates you receive as an ECM or Community Supports provider aren't always sufficient to cover the work you do to assist unhoused individuals.
- You are seeing competition emerge across ECM or Community Supports providers in your community.
- You struggle to connect clients whose vulnerability scores are lower on your CoC's By-Name-List to CalAIM benefits.
- ECM and/or Community Supports utilization is low in your community.

# Lessons Learned from California's Integration Initiatives

## Key Takeaways

- Medi-Cal's coverage of housing-related Community Supports and has given rise to powerful programs that can provide tangible benefits for individuals with complex care needs, including people experiencing homelessness.
- Health care, particularly managed care, is an increasingly important player in the homeless system, with tremendous opportunities to address homelessness with health resources by expanding, deepening, or sustaining services.
- Better outreach, coordination, and alignment across sectors is needed to realize the full potential of CalAIM. Streamlining administrative complexities and better integrating the health care and homeless systems would help increase program participation and maximize resources and opportunities
- Flexible funding infusions can catalyze systems change, allowing for critical and strategic investments to fill gaps and support foundational improvements, and should be paired with long-term funding to sustain progress.

# Program Development Recommendations

State initiatives/programs should:

be informed and collaboratively administered by experts from both systems.

ensure more inclusive processes for program planning, design, and development and wide-spread communication to engage more sectors.

include both flexible up-front investment funds and sustained funding.

be supported by a variety of capacity building efforts across systems, as well as state and local guidance and incentives.

# Program Development Recommendations

## Additional Considerations

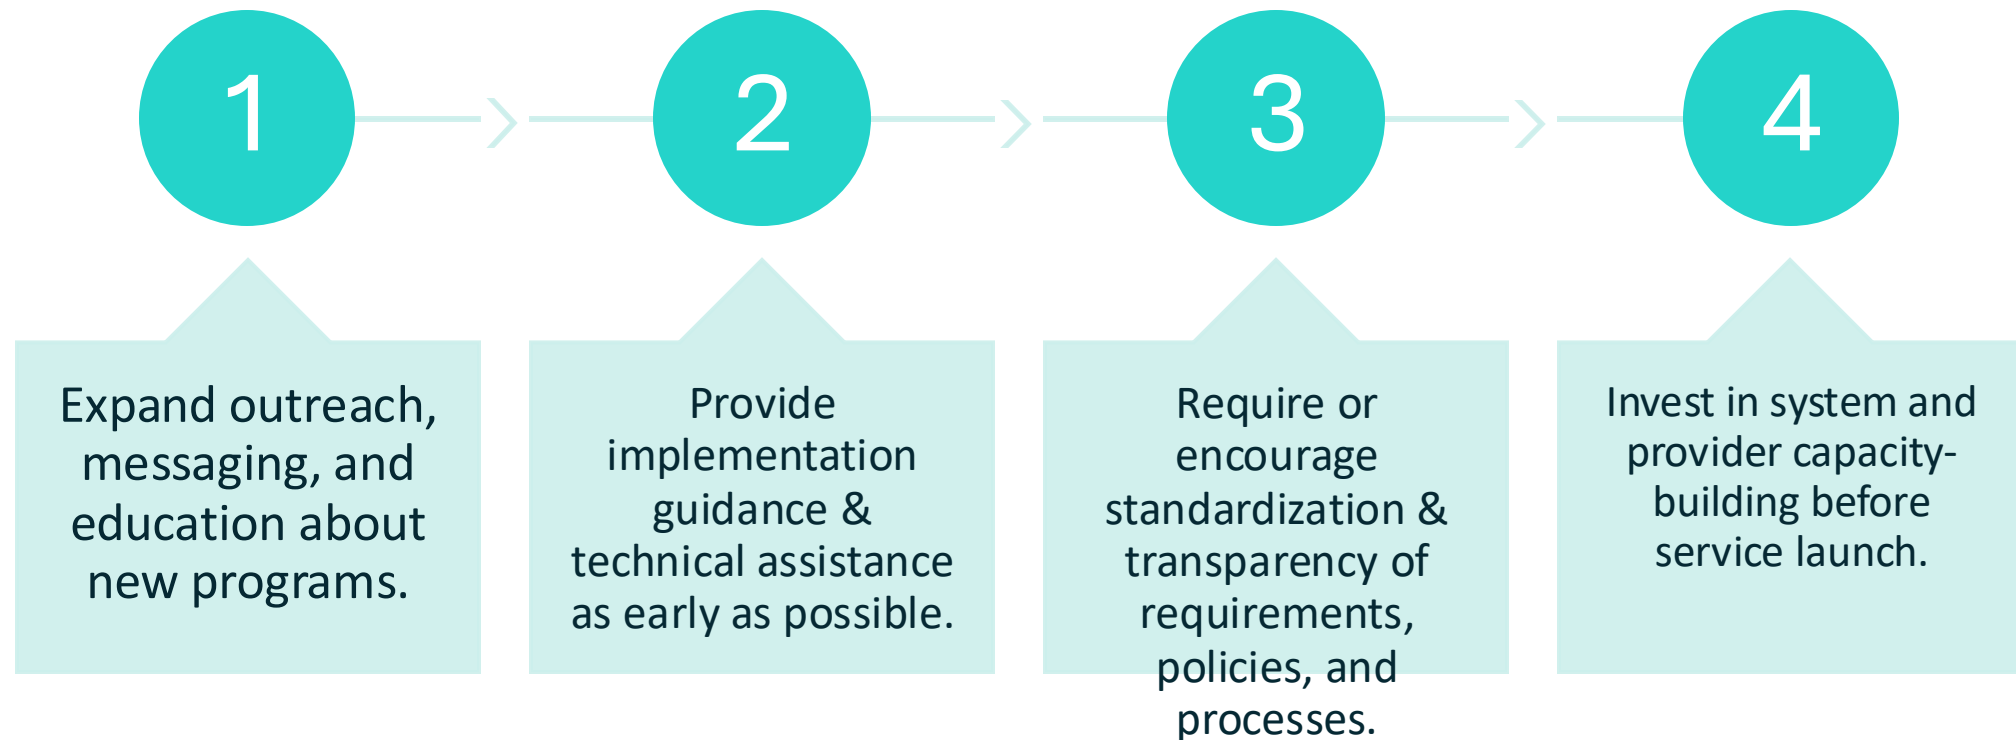

These program elements can improve the likelihood of successful local implementation and meaningful, long-term systemic collaboration and partnership:

- Financial incentives for cross-system partnership, with funds awarded jointly to both systems
- Additional time between program development and implementation
- Flexibility in implementation requirements to accommodate local contexts (esp. for smaller and rural communities)

# Planning & Implementation Support Recommendations

State agencies and counties should:

# Local Implementation Recommendations

## Strategies to Strengthen Local Implementation

### Make ECM/CS processes simpler & more accessible

- Minimize eligibility requirements
- Simplify documentation requirements
- Streamline authorizations
- Simplify billing process

### Enhance provider support

- Build provider capacity (e.g., TA, trainings, funding)
- Set up administrative/billing hubs
- Establish mentorship/peer learning opportunities

### Enable providers' financial sustainability

- Making braiding of funding easier (e.g., guidance, allow flexible approaches)
- Increase provider negotiating power
- Consider rate reform

### Integrate systems where possible

- Standardize referral flows
- Enhance access to Medi-Cal/MCP info (e.g., real-time enrollment info for CoC providers)
- Integrate ECM/CS into CoC systems (e.g., CE processes, HMIS, joint assessments)

### Promote better data sharing systems and info sharing

- Leverage guidance State is developing
- Enable info sharing to track referrals, services, outcomes
- Standardize data sharing agreements

# Fact Sheets: ECM and Community Supports from Across the State

- CA-wide and every CoC.
- Used 2023 data for consistency; all data sources described in the document.
- Useful for community-specific conversations about need, utilization, and likely eligibility.
- Easy to update with 2024 data.

## Alameda County

 Homebase with support from the California Health Care Foundation - Feb 2025

- **Two Managed Care Plans (2023):** Alameda Health Alliance and Anthem Blue Cross<sup>1</sup>
- **Total Managed Care Medi-Cal Enrollment (2023):** 440,994
- **Whole Person Care/Health Homes participant:** Yes

### NEED

Calendar Year 2023

**13,655**

Estimate of People Experiencing Homelessness  
in Alameda County via HMIS/HDIS.

**7,936**

Estimate of People Experiencing Homelessness  
Who Accessed Care through the Emergency Department

**9,342**

Estimate of People Experiencing Homelessness  
with Disabling Conditions

### ACCESS/SERVICES

Calendar Year 2023  
Quarter 4 only

#### Enhanced Care Management (ECM)

**2,567**

Number of Members who are  
**Enrolled in Enhanced Care Management (ECM)**<sup>2</sup>

26%

**665**

Enrollment of Members  
**Experiencing Homelessness in ECM**

#### Community Supports

**2,496**

Number of Members who  
**Utilized Community Supports**

26%

**657**

Number of Members Receiving  
**Housing Transition Navigation Services**

38%

**959**

Number of Members Receiving  
**Housing Tenancy and Sustaining Services**

2%

**47**

Number of Members Receiving  
**Housing Deposits**

<sup>1</sup> As of January 1, 2024, Anthem Blue Cross is no longer serving Medi-Cal members in Alameda County. As of January 1, 2024, Kaiser Permanente began serving Medi-Cal members in Alameda County.

<sup>2</sup> CalAIM has pre-identified Populations of Focus (POF), which includes both adults and children experiencing homelessness. When MCPs report the data, they select a single POF for the Medi-Cal member. Given the intersectionality that leads some of the POFs to overlap, there may be additional people experiencing homelessness receiving ECM who are categorized under other POFs.

# Join us for Office Hours

## **Office Hours Session 1: Thursday May 1st, 11am-12pm**

Learn how to use Homebase's CalAIM data fact sheets and how to get updated data for your community

## **Office Hours Session 2: Tuesday May 6th, 10-11am**

Come with any CalAIM challenges or opportunities you're trying to address in your community

# Resources for Building Health Care-Homeless Response System Partnerships

*Addressing the health-related needs of people experiencing homelessness is central to ending homelessness, and stable housing is fundamental to maintain good health. Collaboration between homeless response and health system partners is critical to better serve people and to improve outcomes for individuals and families, as well as the systems designed to support them. This page contains Homebase-developed resources to support cross-system learning, collaboration and partnership, and systems integration.*

Check out Homebase's resources on:

- Cross-sector data sharing
- Medicaid Renewals for People Experiencing Homelessness
- Cross-sector relationship building
- Enhanced Care Management, Community Supports, and HHIP
